Art Unit: 2652

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1, 2, 4-10, 12, 14-20, and 22-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over SHUKH et al (6,504,675).

Note figures 1, 2, and 6. SHUKH et al shows a perpendicular magnetic recording head having a first soft magnetic return layer/pole (21) and a second soft magnetic write layer/pole (22) which is magnetically coupled to the return pole remote from the media (see figure 2). The second write layer/pole has a trapezoidal shape. The head is used in a disk drive system with an actuator that moves the head between plural tracks (see figure 1). The perpendicular recording medium is shown in figure 2.

Art Unit: 2652

SHUKH et al differs in not listing any dimensions for the head (re claims 1, 3, 9, 11, and 17).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to configure the head of SHUKH et al to have the listed dimensions. The motivation is as follows: these would have been the obvious result of routine experimentation and optimization. One of ordinary skill in the art would routinely experiment and optimize where no dimensions were disclosed.

4. Claims 13 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over SHUKH et al (6,504,675) in view of KHIZROEV et al (6,513,228).

SHUKH et al shows a perpendicular recording head substantially as claimed. SHUKH et al differs in not showing the read head.

It is well known to combine read and write heads in one head structure. KHIZROEV et al shows a combined perpendicular write and MR read head.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide an attached MR read head on the write head of SHUKH et al as shown by KHIZROEV et al. The motivation is as follows: this is a well known and common combination. One of ordinary skill in the art would utilize such a known configuration where none was specified.

5. Applicant's arguments filed 8/25/03 have been fully considered but they are not persuasive.

Art Unit: 2652

Applicant argues that SHUKH et al does not disclose that the second magnetic layer have the trapezoidal shape remote from the pole tip.

This is in error. There is absolutely no basis for saying that the second magnetic layer has the trapezoidal shape only at the extreme end. A complete reading of the SHUKH et al disclosure clearly indicates that the trapezoidal shape at least extends away from the end of the pole tip, if not for the entire extent of that layer.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
